Week-Long Projects

Construction

Project will be done every-day until its completed

Children learn by exploring, observing and figuring out the way things work by experimenting. Building a ramps teaches children about speed, gravity and velocity as well as cooperation and teamwork. This is a great way to get children thinking, exploring, problem solving, and observing. Challenge there thinking by asking them question such as which ramps are faster or slower.

For this project we will be using cardboard, bottle cap, paper rolls, stick and paint.

Loose Parts Play

Project begins 17th April until end of holiday program

Loose parts play is a type of play that supports invention, divergent thinking, problem solving and offers a sense of wonder to children. They are materials that can be moved, carried, combined, redesigned, lined up, and taken apart and put back together in multiple ways.

Over the weeks, children will either work in small groups or individually to create. Whether it be building the tallest tower in the world or the smallest café, children will work together to strategically construct or simply participate in outdoor imaginary play.

We are more than happy to accept donations of unwanted items from our families!
